

Constant supports Type 19

**Constant supports
type 19 D3 17 to 19 93 17**
Standard design,
delivery from stock.

Load plate with integrated slide plate. This must be considered in the selection of clamp bases.

① Dimension E in blocking position right at top – in other blocking positions E shortens accordingly and allows adjustment of + 60mm.

② Type 19 .. .7 is fitted with a load plate with PTFE slide plate as standard. If needed, this type can also be supplied with a high temperature slide plate, type 19 .. .6 (see table below).

③ Under certain circumstances the support bracket with the height K can be dispensed with. It should however be ensured that the load adjustment screws are accessible.

type 19* with slide plate		øL ₁
up to 180°C	up to 350°C	
19 D. .7	19 D. .6	40
19 1. .7	19 1. .6	40
19 2. .7	19 2. .6	40
19 3. .7	19 3. .6	65
19 4. .7	19 4. .6	65

19 6. .7	19 6. .6	110
19 7. .7	19 7. .6	150
19 8. .7	19 8. .6	150
19 9. .7	19 9. .6	150

* friction value of the slide plates see table p. 7.11

Max. permissible stresses:

- Emergency (HZ) at 80°C = calibration load x 1.33
- Faulted condition (HS) at 150°C = calibration load x 1.66.
- Max. blocking load at 80°C = calibration load x 1.5.

Order details: constant support type 19, marking:, calibration load: ...kN, travel: ...mm up/down, blocking position (as required): ...mm
